

EXHIBIT B

A brief description

The evidence transferred this time was a 1 TB flash drive, which was named 106030, which contained 260932 files. In short, the TDPO and New Taipei City Investigation office were between February 7, 2017 and February 14, 2017, and performed searches at the residences and offices of UMC and its employees (Wang Yongming, Ho Jianting, Rong Letian) .A total of 26 electronic devices were seized, including mobile phones, computers, flash drives, and hard drives. The devices were immediately delivered to the MJIB Forensics Laboratory for forensic examination. During the laboratory inspection, it was found that one of the flash drives could not obtain the data because of damage. For other electronic devices, the data was obtained by the identification software and stored in the folders. Below I briefly explain what these folders represent.
